Strange has combined quality axle components at money saving prices. As with all Strange packages, Strange pro race axle packages are designed to allow for easy installation. Our packages save you shopping time, down time and money.

About the A1100 GM kit... We offer 10 & 12-bolt GM rear end owners the best of both worlds- A thru-hardened Pro Race axle that has been re-designed for circle track and hard-core street/strip use. This is only possible due to the design of factory 10 & 12-bolt rear ends and extensive testing by Strange Engineering. Our specially designed c-clip eliminator kit (A1100) employs giant timken unit bearings, which survive severe side loads and constant use (ball bearings are designed for drag racing only). The axle shaft is tapered to resist bending loads and the axle flange is machined to a generous radius for maximum side load strength.

GM Street/Strip and Oval Track C-Clip (A1100) Eliminator Axle Packages

P1011GOT Pro Race (Hy-Tuf) axles for **Small GM housing end (8.20"/8.50" and 12-bolt car)**. Choice of bolt circle. Plus c-clip eliminator kit (A1100), **designed with a unit bearing for oval track and street/strip applications**, & 1/2" stud kit (kit)... **\$489.50**
