Strange Axle Stud Kits

Strange offers the choice of two types of 5/8" stud kits. Our traditional (A-1027) stud kit features premium bolts & adjustable sleeves (.875" long). The A-1027 is the lightest stud kit type (except for titanium). In addition to the traditional 5/8" stud kit we offer five lengths of chrome-moly stud kits. Ensure measurement "A" is able to fully engage into your wheel. The "A" dimension of the drive stud needs to be slightly greater than the combined thickness of the brake hat or drum and the thickness of the wheel.

Every 5/8" stud kit includes aluminum anti-marring washers that protect the wheel from the nut. Anti-marring washers are offered in three different widths, .250", .4375" and .688". The .4375" washer is our standard washer thickness; however, you can choose to substitute with either the .250" or .688" thick washers (see the gold box at the bottom of this page for proper part numbers).

Strange Titanium studs are manufactured from Ti-17 which is over 20% stronger and harder than 6AL-4V titanium- that is commonly used by other manufacturers. Our Ti-17 studs have a tensile strength of 180 KSI & a hardness of 40 Rc.

Strange 1/2" stud kits are offered in 2" and 3" lengths. The stud length refers to the threaded portion of the stud; therefore, when determining the usable thread protruding through the axle, subtract a .125" (washer) and the thickness of the axle flange. Strange 1/2" studs are designed to accept 1/2"-20 lug nuts (not included with kit).

Strange 1/2" Stud Kits

A1025 2" screw-in stud kit for Strange axles (1/2"-20). Includes bolts and washers (10 of each)..... \$20.54

A1026 3" screw-in stud kit for Strange axles (1/2"-20). Includes bolts and washers (10 of each)..... \$20.54

Strange Traditional 5/8" Stud Kit

A1027 3" screw-in stud kit for Strange axles (5/8-18). Features 3" bolts with .875" adjustable sleeves. Includes lug nuts (10 pcs.), .4375" aluminum wheel washers (10 pcs.), and wrench (1 pc.) (kit)..... \$79.50

Strange Titanium 5/8" Stud Kits

A1037TS Strange **TITANIUM** 5/8" stud kit. Includes **STEEL** lug nuts, .4375" aluminum wheel washers, and locking nuts. Saves 1 lb. compared with chrome-moly. (A= .875", B= 2.063", C= 2.875", D= 1.188") (10 of each)..... \$285⁰⁰

A1037TA Strange **TITANIUM** 5/8" stud kit. Includes **ALUMINUM** lug nuts, .4375" aluminum wheel washers, and locking nuts. Saves 1.55 lbs. compared with chrome-moly. *NOTE: aluminum lug nuts are illegal for certain classes.* (A= .875", B= 2.063", C= 2.875", D= 1.188") (10 of each)..... \$329⁰⁰

Strange Chrome-Moly 5/8" Stud Kits

A1036 Strange chrome-moly 5/8" stud kit. Includes lug nuts, .250" aluminum wheel washers, and locking nuts. (A= .775", B= 1.550", C= 2.362", D= .775") (10 of each)..... \$79.50

A1037 Strange chrome-moly 5/8" stud kit. Includes lug nuts, .4375" aluminum wheel washers, and locking nuts. (A= .875", B= 2.063", C= 2.875", D= 1.188") (10 of each)..... \$79.50

A1037MD Strange chrome-moly 5/8" stud kit. Includes lug nuts, .250" aluminum wheel washers, and locking nuts. (A= .875", B= 1.760", C= 2.572", D= .885") (10 of each)..... \$79.50

A1038 Strange chrome-moly 5/8" stud kit. Includes lug nuts, .4375" aluminum wheel washers, and locking nuts. (A= 1.187", B= 2.375", C= 3.187", D= 1.188") (10 of each)..... \$79.50

A1039 Strange chrome-moly 5/8" stud kit. Includes lug nuts, .4375" aluminum wheel washers, and locking nuts. (A= 1.500", B= 2.688", C= 3.500", D= 1.188") (10 of each)..... \$79.50

A1041 Strange chrome-moly 5/8" stud kit. Includes lug nuts, .4375" aluminum wheel washers, and locking nuts. (A= 1.875", B= 3.125", C= 4.00", D= 1.250") (10 of each)..... \$79.50

When .250" or .688" aluminum washers are needed to substitute for standard .4375" thick washers, add the following suffix to the stud kit part number:
S = .250" washers (Example A1038S)
L = .688" washers (Example A1041L)
