

9" Components

3.250" bore- accepts 35-spline and 2.00" bearing journal 40-spline spool.

3.812" bore- for superior Strange 2.250" bearing journal 40-spline spool.

4.00" bore- for Strange drop-out live axle axle assembly.

P3812LT pictured

Ultra Case Packages The Ultra case requires larger than OEM components and is therefore offered with a unique package. Packages include: Ultra Case, pinion support body, pinion bearings & cups, pinion bolts, pinion depth shims, pinion seal, pinion nut, side bearings & cups, premium ring gear bolts, tail bearing and tail bearing retainer plate.

P3250LT 3.250" bore Ultra Case package. Fits **large stem** pinion (package)..... \$849⁰⁰

P3250ST 3.250" bore Ultra Case package. Fits **small stem** pinion (package)..... \$849⁰⁰

* P3812LT 3.812" bore Ultra Case package. Fits **large stem** pinion (package)..... \$849⁰⁰

* P3812ST 3.812" bore Ultra Case package. Fits **small stem** pinion (package)..... \$849⁰⁰

* P3812LTC 3.812" bore Ultra Case package. Fits **large stem** pinion. Features pinion support body with coupler cover (F/C) (package)..... \$949⁰⁰

* P3812LB 3.812" bore- **Lightweight ball bearing** Ultra Case pkg. Lightened Ultra Case and rear pinion angular contact ball bearing. Fits **large stem** pinion (package).... \$959⁰⁰

* P3812SB 3.812" bore- **Lightweight ball bearing** Ultra Case pkg. Features a lightened Ultra Case and rear pinion angular contact ball bearing. Fits **small stem** pinion (package).... \$959⁰⁰

P400LT 4.00" bore Ultra Case package. For Strange L-6000 drop-out live axle only. Requires L6000J spool. Fits **large stem** pinion. Call if using a 2.91 ratio (package).... \$985.50

P400LTC 4.00" bore Ultra Case package. For Strange L-6000 drop-out live axle only. Requires L6000J spool. Features pinion support body with coupler cover (F/C). Fits **large stem** pinion (package).... \$1061.50

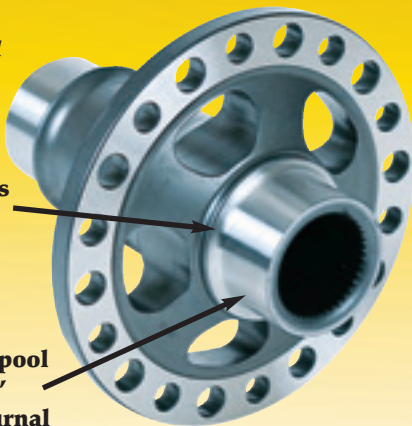

* All 3.812" bore cases require steel spool #D2002 or aluminum spool #D2004.

Notes: (1) Optional load bolt- \$38.50 (2) U.S. Strange/Chrisman 10" development gear sets require N1950H pinion support spacer kit- \$65⁰⁰ (3) See pages 39-41 for complete list of components.

40-spline spool
with 2.250"
bearing journal

Why a 3.812" bore case?

The 3.812" bore Ultra Case was designed to meet and exceed today's most abusive drag racing applications. In the past, the standard **large bore** was 3.250"; however, 40-spline applications that use a 3.250" bore case are limited to a 2.00" o.d. spool bearing journal. In highly abusive applications (Pro-Mod, Alcohol...), a spool with a 2.00" bearing journal can potentially distort and may eventually fail.

The 3.812" bore case allows for the spool bearing journal o.d. to be increased from 2.00" to 2.250", without compromising the side carrier bearings. The .250" increase is a tremendous increase in strength, even allowing the use of an **aluminum** (D2004) spool for limited 40-spline applications. The increased spool journal size also provides a stronger foundation for the ring gear, which helps increase gear life.
