

9" Components

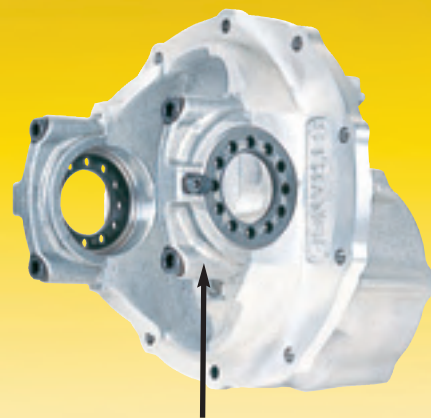

Strange Lightweight Aluminum Case

Strange Lightweight Aluminum Case is designed for applications where weight is crucial and gear set life is not an issue, Strange offers a lightweight, high tensile, aluminum alloy Ford 9" case. This case, with forged aluminum bearing caps, is a full 20 pounds lighter than the Strange Pro nodular iron unit, yet it has a greater tensile strength than an OEM 9" Ford case.

While not suited for heavier or blown drag race cars, the lightweight aluminum case is ideal for most lighter E.T. sensitive cars and non-blown dragsters.

N1901 Strange 9" lightweight aluminum **3.0625"** bore case w/forged aluminum caps, steel adjuster nuts & pinion support bolts (Strange)... \$379.50

N1904 Strange 9" lightweight aluminum **3.250"** bore case w/forged aluminum caps, steel adjuster nuts & pinion support bolts (Strange)... \$379.50

Strange caps are forged from 2014T-6 aluminum
