

9" Components

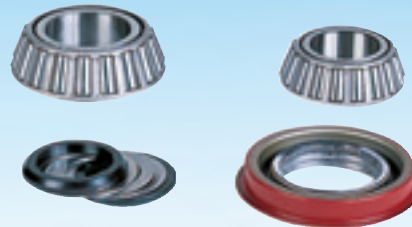

N1917 pictured

N1917 Forged aluminum pinion support with cups installed. Includes pinion support o-ring and pinion support bolts for Strange iron case (each)... \$139.50

Machined to enhance and increase oil lubrication to the pinion bearings- ideal for street/track applications

N1916 Pinion bearings (front pinion bearing #M88048, rear pinion bearing #HM89443), 2-pc. preload spacer with shims and seal (#7044NA). For use with N1914, N1915 & N1917 pinion supports (kit)... \$42⁰⁰

N1922 pictured

Forged aluminum taper bearing pinion support (Drag Racing) (body weight w/ races installed = 3.95 lbs.)- The Strange aluminum taper bearing pinion support (N1922) is completely CNC machined from Strange designed forgings. The Strange forging offers optimal grain structure and provides superior strength to random grain flow billet pinion supports. This support accepts larger than stock front and rear pinion bearings - allotting for a tremendous increase in thrust capacity and improved rigidity for the pinion shaft. The N1922 offers an optimal solution for drag racers seeking to replace failure prone stock supports. The N1922 support is designed to survive the most abusive drag racing conditions; however it is not designed for continuous use.

The N1922 pinion support body is designed to accept a large stem (35-spline) pinion shaft and a small stem (28-spline) pinion shaft. Pinion support installation kit #N1923 fits a 28-spline pinion shaft and kit #N1924 fits a 35-spline pinion shaft. When changing from a 28 or 35-spline pinion shaft, all that is needed is a new pinion support installation kit.

N1922 Forged aluminum pinion support with cups installed. Includes pinion support o-ring and pinion support bolts for Strange iron case (each)... \$120.05

N1923 Kit for N1922 using 28-spline pinion shaft. Pinion bearings (front pinion bearing #2790, rear pinion bearing #HM804846), pinion adapter sleeve, Torrington pinion bearing washer, 2-pc. preload spacer and seal (#7044NA) (kit)... \$49.50

N1924 Kit for N1922 using 35-spline pinion shaft. Pinion bearings (front pinion bearing #2788, rear pinion bearing #HM804846), 2-pc. preload spacer with shims, solid preload spacer and seal (#472015) (kit)... \$45.50
