

12-Bolt Drop-Out Center Section

- 35 & 40-spline available
- Reduced rotating weight
- Assembled units weigh as little as 39.90 lbs.
- 3% more efficient than a 9" Ford = More H.P.
- 8-9 lbs. lighter than comparable 9"
- Less friction • Lightly pre-loaded bearings for less drag

The 12-bolt drop-out was created by Strange in 1994 and has been relied on by leading Competition Eliminator cars. The 12-bolt drop-out is offered in two case bore sizes- 3.0625" and 3.250"- both cases fit 9" housings (Some factory housings require modification). Strange's 3.0625" bore case accepts factory posi-units and Strange 30 and 33-spline 12-bolt spools. The 3.250" case accepts specially designed 35 & 40-spline ultra light spools.

The 12-bolt drop-out case is designed for the racer seeking the least amount of weight and where lower E.T. is crucial. The 12-bolt pinion is closer to the center of the ring gear, in comparison to a 9" gear, making the 12-bolt 3% more efficient than a 9" rear (9" pinion is 2.250" below the center of the ring gear; compared to a 1.50" drop for our 12-bolt). Besides being more efficient, the fully assembled unit is 8-9 pounds lighter than a comparable aluminum 9" assembly.

For years, racers have spent small fortunes in acquiring aluminum, titanium, and magnesium components. The 12-bolt drop-out recovers horsepower, as well as being extremely light and at the same cost as conventional Strange 9" components.

Fully Assembled Strange 12-Bolt Drop-Out Center Section & Options

PRG500 Fully set-up 12-bolt drop-out center section. Features 12-bolt aluminum case, standard gear set, ultra light steel spool (35 or 40-spline), and chrome-moly yoke (fully assembled)..... **\$1,325.37**

PRG505 Fully set-up 12-bolt drop-out center section. Features 12-bolt aluminum case, standard gear set, ultra light steel spool (35 or 40-spline), and chrome-moly female coupler (fully assembled)..... **\$1,260.52**

OPRG01 Upgrade to Pro (9310) gear set..... **\$99⁰⁰**

OPRG03 Upgrade to aluminum spool..... **\$81.24**

D3596 Lighten ring gear..... **\$75⁰⁰**

12-Bolt Drop-Out Cases, Install Kits & Spools

N1200 12-bolt aluminum drop-out 3.0625" bore case. Accepts posi-units & Strange 30/33-spline 12-bolt spools (ea)... **\$423.72**

N1202 12-bolt aluminum drop-out 3.250" bore case. Accepts Strange 35 & 40-spline ultra light spools (ea)... **\$423.72**

R5214 Master installation kit for N1200 (3.0625")... **\$119.50**

R5216 Master installation kit for N1202 (3.250")... **\$119.50**

D1535 35-spline ultra light steel spool (only for use with N1202 case) (7.68 lbs.) (ea)... **\$316.80**

D1537 35-spline ultra light **aluminum** spool (only for use with N1202 case) (4.40 lbs.) (ea)... **\$398.04**

D1539 40-spline ultra light steel spool (only for use with N1202 case) (7.68 lbs.) (ea)... **\$316.80**
