

Strange S-Series Drag Race Brakes

The S-Series brake kit is an economical alternative to the Pro Race brake kits. S-series rear drag race brake kits include: Forged aluminum 4-piston calipers with 1.75" diameter pistons, extra thick (.430") solid forged rotors, billet caliper mounts, necessary mounting hardware and soft pads (optional metallic pads- use suffix "M"- same price). The S-series brake kit weighs 29.10 lbs. compared to 23.70 lbs. for the Strange Pro Race brake kit. The Pro Race slotted rotor weighs 7.3 lbs., while the S-Series solid rotor weighs 10 lbs.
