

**(b) Smaller dissimilar piston bore sizes for superior braking “feel”-** The Ultra Caliper incorporates dissimilar bore sizes of 1.625” and 1.500” for optimal feel, superior braking and improved pad wear.

**(c) Stainless steel bushing to eliminate all shims and washers-** Time is valuable between rounds- therefore, we eliminated all spacers, washers and shims. The Ultra Caliper has a stainless steel flanged bushing that is pressed into each caliper mounting hole by Strange. The bushing guides the mounting bolt as well as provides a flat and wear-free mounting surface for the caliper mounting bolt.

**(2) The least amount of weight; rotating & static-** The **entire** assembled rear 11” carbon kit (pair) weighs only 14.95 lbs. Each 11” disc weighs a meager 1.68 lbs. and when mounted on the rotor mount- still only weighs 3.10 lbs. Each carbon pad weighs .20 pounds.

**(3) 11” carbon rotors and carbon pads-** The 11” (outside diameter) carbon rotors are .50” smaller than other kits on the market. The smaller 11” diameter carbon generates more heat than the 11.50” carbon- providing peerless braking for Pro and Sportsman racers. The 11” carbon also provides the lightest rear disc weight on the market at a mere 1.68 lbs. The smaller, less cumbersome, rotor diameter is more conveniently removed when making adjustments to the rear of the vehicle. Each brake pad has been slotted to allow carbon dust to escape, improving rotor and pad longevity.

**(4) Aluminum carbon/carbon rotor mount-** Is designed to withstand the intense heat which is initiated from the release of energy (braking) through the braking system. Each aluminum rotor mount is manufactured from a heat resistant aluminum and then hard coated to further insulate the aluminum. Each rotor mount accepts a separate aluminum retaining ring to evenly spread the load of the rotor mounting bolts.

### **Strange Pro Race Rear Carbon Kits include the following:**

**Ultra calipers, billet aluminum caliper mounts, mounting hardware, 11” carbon rotors and slotted carbon brake pads.**

\***C18004UC** Fits Olds ends (4.75” bc/2.8325” brake gap) (kit)... **\$2,695<sup>00</sup>**

\***C18084UC** Fits Early B.F. ends (4.75” bc/2.335” brake gap) (kit)... **\$2,695<sup>00</sup>**

\***C18104UC** Fits Symmetrical ends (4.75” bc/2.8325” brake gap) (kit)... **\$2,695<sup>00</sup>**

\***C18104DBUC** Fits Strange (H1136) Symmetrical ends (4.75” bc/2.8325” brake gap) (kit)... **\$2,695<sup>00</sup>**

\***C18104NBUC** Fits Strange (L5500SBB) ends (4.75” bc/2.351” brake gap) (mounts not included) (kit)... **\$2,590<sup>00</sup>**

\* **For 5” b.c. - replace the 4 with a 5 in the part number**
